**Page** 

The project was undertaken with the assistance of the Victorian State Government

### 1. INTRODUCTION

The purpose of the Recreation Strategy is to develop a strategic direction for recreation provision in Mildura for the next 10 years. In particular the strategy provides:

- A service policy and development plan that responds to Council's corporate 'Vision' and Purpose and to Council's Key Result Areas relating to Recreation;
- An understanding of current participation trends in the community and of future community aspirations in relation to recreation;
- An understanding of current gaps in provision and future needs;
- A framework for future planning and development of recreation and open space assets;
- An understanding of indoor sport infrastructure requirements and how this can best be provided for:
- An 'Action Plan' that articulates priorities, key internal and external stakeholders and resourcing implications.

The project has involved extensive community consultation and research including a household survey, a survey of young people, community forums, workshops, interviews and the review of sumbissions and other Council service planning documents.

The Recreation Strategy consists of:

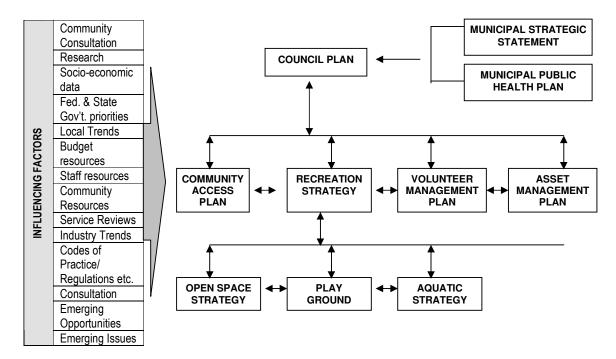

### The Action Plan

This document provides an overview of the key principles that that will guide priority setting for recreation over the next 10 years. The Action Plan details recommendations and anticipated key outcomes. It also details the role that Council will play in implementing the recommendation and other key stakeholders that will need to be engaged.

### **Background Papers**

This document details the research undertaken for the project.

The following diagram provides an example of the relationship between Council's strategic planning documents and in particular how they relate to recreation planning.

The Recreation Strategy recognises the need to effectively integrate all service and community planning projects and processes. This will:

- Avoid duplication of service planning and delivery resourcing;
- ensure that all Departments within Council identify opportunities to build on services provided or Planned by other Departments;

- Reinforce the benefits of a co-operative approach to the implementation of strategic plans;
- Clearly identify areas of responsibility relating to the implementation of service and facility planning projects; and
- Ensure that all planning projects and processes 'talk to each other'.

The range and complexity of issues that Recreation Services has to deal with requires close partnerships with nearly all other Council service areas. The ability of the organisation to deal with issues and opportunities relating to recreation effectively and efficiently therefore requires co-operative and effective processes.

The project clearly identified a range of recreation related issues and opportunities that were common across a significant number of services areas. This reinforces the need for co-operative planning and development of recreation services because it engages so many of Council's Departments.

The Action Plan in Section 7 identifies the range of both internal and external stakeholders that need to be involved in the implementation of the Recreation Strategy.

### 2. DEFINING RECREATION FOR MILDURA

Mildura has a rich history of community involvement in recreation and this is particularly reflected in the keen participation levels in sport. Sport is a significant part of Mildura's community life and provides opportunities for individuals and communities to come together to celebrate, socialise and for mutual support and encouragement.

This strategy recognises the need to adopt a broad definition for recreation if Mildura is to offer the diversity of recreation choice that is expected of a major regional city and if it is to capitalise on recreation opportunities associated with tourism and special events.

For Mildura as a major regional city it is important that attention be given to the importance of recreation on a number of scores including:

- the City will increasingly have to provide for an ageing rural community. A priority will be to keep
  this demographic as active as possible to avoid the economic burden of disease that comes with
  inactivity, and
- the need to compete with other rural areas in terms of lifestyle attractors. This will require the support of a diversity of recreation opportunities that cater for other than the traditional rural sports of football, tennis and cricket.

Over the period of this Recreation Strategy there is a need to actively develop and promote recreation opportunities that reflect Mildura's understanding of the full meaning of recreation. Recreation will then play an active part in the physical, economic and environmental health and prosperity of the region and its people.

In summary this strategy is based on Recreation meaning:

- a casual walk or bike ride along a riverside trail, or
- playing chasey in the park with friends or the family dog, or
- working out in the gym or training for a marathon at the local oval, or
- fishing or reading from the sides of the Murray river, or
- visiting sites of historical interest or working with the local historical preservation society, or
- playing competitive sport or having a social game of sport with a group of friends, or
- volunteering for a sporting, service or welfare organisation, or
- being involved in producing a local play, festival or attending a local art and craft exhibition.

It will not be possible for Council alone to provide for the type and level of recreation needs that are being expressed by the growing Mildura community. This is particularly the case for Mildura where the expansion of the city centre and its surrounds is requiring significant resourcing for basic community infrastructure.

Partnerships will be critical if the City is to address the community's changing and expanding expectations regarding recreation.

### 3. **METHODOLOGY**

An comprehensive methodology was used for the project to maximise input to the project. In particular the project took advantage of the previous research that has been undertaken by the Mildura Rural City Council, and other regional, State and Federal Government agencies and organisations.

The project was extensively promoted via the following channels:

- the local print and electronic media
- direct mail to community organisations including sport and recreation clubs, service groups and township groups
- telephone contact/followup
- Council's website
- 'How to be Involved' flyers, and
- vicariously through the consultation process e.g. household surveys, school surveys, community forums.

Over 580 individuals, groups or organisations had direct input to the project. This was through household surveys (300\* respondents), a survey of young people (204 respondents), school surveys (18 respondents), community forms, interviews and submissions.

The information was then extensively analysed and recurring themes, needs and issues identified. These were then incorporated into a 10 year Action Plan and key performance indicators established.

\* Note that a survey sample of 300 or more is considered a valid sample size for the population of Mildura, and at a 95% confidence level it is anticipated that results will have a maximum margin of error of approximately 5.4% (+/-). (Source: Fieldworks, Melbourne, 2004).

### 4. PARTICIPATION IN RECREATION

Six of the 12 most popular recreation activities for Mildura residents are likely to be activities that do not involve competition or club membership. Instead, they are activities that are likely to be undertaken on an informal basis and possibly at irregular times.

For Mildura residents these activities are casual walking, golf, swimming, fishing, gym/fitness activities and bike riding. These trends are consistent with state and national trends. It is important to note some of the trends in participation over time as these provide some direction in terms of future provision requirements.

In the period 2001 to 2005 aerobics/gym activities increased in participation by 50.9%, walking by 37.2%, bike riding by 14.5% and running by 13.6%. Soccer was the only 'sport' to have had an increase in participation at 11.4%. (1)

During the period 2001 to 2005 the Loddon/Mallee Region recorded higher participation rates for walking (33.5%) and tennis (10.4%) compared to the State average. However participation rates for aerobics (10.6%), swimming (9.4%) and cycling (8.3%) were lower than the State average. (2

Consideration must be given to the vast Table 1 - The 12 Activities Undertaken Most Frequently Over the Last difference in provision across the whole region in drawing any conclusions for that area. Some LGAs in the region have few or no facilities that cater for some activities e.g. gymnasiums and indoor pools while other LGAs have a higher level of provision.

Research identifies that generally the local sport and recreation sector is male orientated with a higher percentage of organisations catering for male participants. (3)

In the Northern Region, of which Mildura is a part, 43% of organisations have predominantly male membership, 19% have predominantly

12 Months by respondents to the Mildura Household Survey

Rank	Activity	Total	Females	Males
		Respondents		
1	Casual Walking	33% (99)	43%	20%
2	Golf	13% (40)	7%	22%
3	Swimming (Indoor)	12% (35)	16%	6%
4	Australian Rules Football	11% (32)	7%	16%
5	Fishing	7% (22)	2%	14%
6	Gym / Fitness Classes	7% (21)	10%	2%
7	Bike Riding	7 % (20)	2%	13%
8	Tennis (Outdoor)	6% (18)	3%	9%
9	Cricket	5% (16)	2%	10%
10	Netball (Outdoor)	5% (15)	9%	0
11	Swimming (Outdoor)	5 % (14)	4%	6%
12	Basketball	3.9% (11)	3%	6%

female membership, and 39% have approximately equal numbers of males and females.

Looking at age and gender, there are more organisations catering for males in the 15-54 years age group than any other gender or age group.

Findings from the Recreation Strategy reinforce the need to encourage and promote alternative recreation participation opportunities for girls and women. Males and females generally enjoy different activities. The main sport and activities provided by organisations with a male membership/participant base include cricket (outdoor), Australian Rules football, Aerobics/gym/fitness, golf, bowls and soccer. The main activities provided by organisations with a female membership/participant base include aerobics, netball, equestrian, gymnastics/calisthenics, tennis and bowls. This is consistent with trends that emerged through the Recreation Strategy.

Throughout the project many associations and clubs reported the need for more social competition/play 'pay and play' opportunities where participants did not have to take on responsibilities relating to club membership and volunteering.

Growth in demand is likely to continue across all sport and recreation activities given the expected growth in population. In particular forward planning needs to occur in relation to soccer (male, female and junior age groups), basketball (particularly junior and social competitions) and netball and cricket to a lesser degree. Participation in activities such as rugby and touch rugby should be closely monitored given their growth in popularity generally and the growth of related cultural groups in Mildura, even though they do not have a high level of participation currently.

Sports encouraged through the Sunraysia Academy of Sport will also have an impact on local and regional demand and will need to be monitored.

(1) The Australian Sports Commission's (ASC) 2005 "Exercise, Recreation and Sport Survey" (ERASS). (2) Victorian's Participation in Exercise, Recreation and Sport" (2001-02). (3) Community Sport Counts, People and Place – 2005.

### 4. THE BENEFITS OF RECREATION FOR MILDURA

The following provides an overview of the established health and wellbeing benefits of recreation.

### SOCIAL BENEFITS such as those associated with

- HEALTH such as:
  - Increased life expectancy e.g. men who exercise are 44% less likely to die prematurely;
  - Decreased risk of heart disease and stroke e.g. sedentary people are up to twice as susceptible to heart disease or stroke:
  - A reduced risk of a range of cancers including bowel cancer;
  - A decreased likelihood of anxiety and depression; and
  - Improved chances of combating conditions such as asthma and arthritis.

Recent estimates from the Department of Human Services indicate that physical inactivity/sedentary lifestyles are responsible for about 8% of the burden of premature deaths in Victoria.

### PERSONAL DEVELOPMENT such as:

- Increased self-esteem associated with mastering skills, and/or improving personal and team performance:
- Reduction in anti-social behavioural tendencies;
- Reduced likelihood of social isolation:
- Increased opportunities for young people to develop support networks with responsible adults:
- Observation and development of positive social skills; and
- Improvement of/maintenance of mental health.

### COMMUNITY BENEFITS such as:

- The strengthening of community support networks;
- Settings through which people can:
  - engage with family and friends,
  - participate in competition,
  - experience the benefits of volunteering.
- Built infrastructure that provides opportunities for a range of sport, recreation and social activities;
- The celebration of community pride and achievement through special events and developing local infrastructure and environments.

### ECONOMIC BENEFITS such as those associated with:

- Employment The number of people whose primary work was in the sport and recreation sector increased by 21.6% between 1996 and 2001;
- Volunteering 8.2% of the adult population were engaged in volunteer work in 2000 and volunteers contributed approx. 433.9 million hours of voluntary work in 1995 across Australia.
- Infrastructure Development Federal, state and local governments contributed in excess of \$2,124 million in 2000-01 to sport and recreation (mostly capital works).

### ENVIRONMENTAL BENEFITS such as those associated with:

- Improved environmental health and wellbeing associated with revegetation and 'greening' projects;
- Improved wildlife environments;
- Improved visual and aesthetic values associated with improved landscape amenity.

The benefits of recreation to the Mildura communities relate in particular to:

- The social and support networks that are created and maintained through recreation;
- The economic benefits associated with recreation tourism and special events;
- Maintaining physical activity opportunities into older age to keep the 'the community' active and physically independent.

### 5. SOCIO-ECONOMIC TRENDS THAT ARE RELEVANT FOR THE RECREATION STRATEGY

There are a number of demographic and socio-economic indicators that have the potential to significantly impact on the level and type of recreation provision in Mildura into the future.

### These include:

- Age related indicators which show that by 2031:
  - That the population will have increased by 36% to 67,056
  - 21.8% of the population will be aged over 65, up from 13.5% of the population in 2001;
  - those aged under 20 years of age will decrease from 30.3% to 23.4%;
  - there will be a slight decrease in the working age groups (20-65) from 56.2% in 2001 to 54.5% in 2031.
- Socio-economic indicators that show:
  - a high level of 'disadvantage';
  - that while the metropolitan areas have a high economic diversity index the rest of Mildura lacks economic diversity which results in decreased work opportunities and as a result a more narrow range of skills available in the community;
  - been 20-30% of children are living in a low income household;
  - the Municipality has the 5<sup>th</sup> highest concentration of people with and the 3<sup>rd</sup> highest concentration of people on Disability Support Pensions of all Victorian LGAs;
  - a lower level of volunteering and participation on decision-making boards than adjoining municipalities;
  - there is a low level of cultural diversity which relates to creativity and innovation;
  - a lower level of participation in both organised (e.g. sport) and non-organised (e.g. bikeriding) exercise than regional Victoria as a whole and Melbourne; and
  - Mildura has higher levels of crime than regional Victoria as a whole and Melbourne

The implications of these indicators and trends for community recreation and sport include:

- ageing rural communities that are no longer able to sustain existing and new recreation opportunities and infrastructure;
- ageing of the population in general and therefore the need for more programs aimed at retaining mobility, health and independence;
- there potentially being less people that are interested in volunteering and taking up positions on decision-making bodies. This is likely to be more relevant in urban areas than in rural areas;
- strained economic and 'personal/social' environments in rural areas that impact on the individual's ability and capacity to contribute to community initiatives;
- low disposable income in a number of both rural and urban communities so that the ability to access recreation opportunities is limited;
- a narrow range of skills and abilities to draw on in rural areas because of the lack of 'skill diversity';
- the need to provide for a range of participation options that can be undertaken at minimal or no cost:
- the decreasing viability and sustainability of community clubs and organisations;
- the significant indigenous population in some communities; and
- comparatively low levels of engagement in physical activity and therefore the need to identify innovative programs that encourage participation so as to minimise health issues in the community.

Further implications for the Recreation Strategy relate to:

- the size of the municipality and the cost of providing basic services to outlying townships and surrounding districts:
- ageing community infrastructure; and
- the infrastructure demands that relate to a growing community.

### 6. PRIORITIES FOR RECREATION FOR THE NEXT 10 YEARS

The following table articulates Council's focus for Recreation for the next 10 years. These key directions have been framed in terms of the four 'environments for health and wellbeing' (the social, natural, built and economic environments) and are based on the findings of the findings of the Recreation Strategy

(Reference: Municipal Public Health Planning Framework, Victorian Department of Human Services)

This will ensure that all recreation benefits to the community are identified and addressed in terms of the Mildura's social, natural, built and economic environments.

### 7. COUNCIL'S VISION AND THE PRINCIPLES THAT UNDERPIN THE RECREATION STRATEGY

The principles have been developed in consideration of Council's Vision and corporate objectives to ensure that the Recreation Strategy recommendations are consistent with Council's service objectives for recreation and sport.

### **COUNCIL'S VISION**

'The most livable, people-friendly community in Australia'

### **KEY RESULT AREAS FOR RECREATION**

The following are Council's key result areas for Recreation.

- A community in which all people have equal access to appropriate recreation facilities and services
- A community that promotes and encourages participation in sporting and recreational activities
- A community that recognises, supports and encourages sports people to achieve their potential
- Community sporting and recreation organisations which have the capacity and support to provide a diverse range of programs and activities
- A community with the appropriate infrastructure that can cater for international, national and state recreation events (Reference: Mildura Rural City Council Plan 2006-2010)

### PRINCIPLES TO GUIDE DECISION - MAKING FOR RECREATION

The following principles were developed as part of the Recreation Strategy and will underpin Council's role in Recreation.

role in Recreation	n.
TOPIC	PRINCIPLE
Regional Context	<ul> <li>Provision of recreation services and facilities takes into account the central role that Mildura plays in the broader region and the cross boundary participation that makes this area unique.</li> </ul>
Benefits of Recreation	<ul> <li>Support is provided to recreation in recognition of the personal, social, environmental and economic benefits that it returns to the community.</li> </ul>
Sustainability	<ul> <li>Provision for recreation will be based on:         <ul> <li>substantiated community need;</li> <li>environmentally sustainable practices and principles;</li> <li>viable solutions;</li> <li>a consideration of both establishment costs and ongoing resourcing demands;</li> <li>partnership opportunities; and</li> <li>flexibility to respond to issues, innovations and challenges as they arise.</li> </ul> </li> </ul>
Integrated Planning	<ul> <li>The effective planning and delivery of recreation services will require a well integrated 'whole of Council' approach:         <ul> <li>given the range of service areas that will be involved in implementing the Plan;</li> <li>to ensure consistent advice and information is provided to the community;</li> <li>maximise opportunities to achieve multiple service outcomes e.g. health and wellbeing, environmental, community service; and</li> <li>to incorporate information from research and other community planning processes.</li> </ul> </li> </ul>
Infrastructure Development	<ul> <li>Priority will be given to recreation development proposals that:         <ul> <li>maximise co-location of activities and facilities;</li> <li>are designed to address a range of compatible uses;</li> <li>minimise management and asset maintenance imposts on the community;</li> <li>form part of a community hub or are part of a strategy to establish a community hub;</li> <li>reflect desired standard and quality of provision; and</li> <li>have secondary benefits e.g. tourism benefits</li> </ul> </li> </ul>
Infrastructure Maintenance	<ul> <li>Maintenance of buildings will:</li> <li>be in accordance with determined standards and agreements with relevant parties; and</li> <li>generally be a priority over the development of new buildings.</li> </ul>
Council's Role & Partnerships	<ul> <li>Council is one of a number of providers of recreation opportunities in the community and its role will be clearly defined.</li> </ul>
Equity of Provision	<ul> <li>Groups providing recreation opportunities will be treated equitably and according to clear criteria in funding programs and provision of services.</li> </ul>
Access to Opportunities	<ul> <li>Council will seek to:         <ul> <li>minimise social, information, physical, economic, and geographic barriers to participation; and</li> </ul> </li> <li>promote inclusive environments, greater diversity of participation and improved access to opportunities for people with special needs.</li> </ul>

### 8. COUNCIL'S ROLE IN IMPLEMENTING THE RECREATION STRATEGY

Council plays a major role in providing for and supporting other groups and organisations that provide for the recreation needs of the community. Council recognises however that it does not have the capacity to address all the recreation needs in the community nor to provide the same level and type of assistance to all groups and activities.

Council has defined the type of role that it will play in relation to each of the actions identified in this Strategy. This role has been determined in consideration of:

- The capacity of the community in relation to the Action;
- Resourcing opportunities available from other sources;
- The capacity of Council to sustain its role over the life of the Strategy; and
- The opportunity for a range of benefits to be achieved from Council's role (e.g. economic, tourism, health and wellbeing) as identified in other strategic plans;

Council will play any one or number of the following roles in relation to the implementation of this Strategy:

### Service Planning

This role includes identifying service needs, gaps, opportunities and service provision partners and developing strategies to address these issues.

### Service Provision and Management

This role includes the direct provision of services and programs; facilitation of program;, development of sport and recreation infrastructure; maximising access to a variety of opportunities through promotion; and encouraging new private and public recreation providers.

### Advocacy

This role includes making representations to potential project and funding agencies and government; and advocating on behalf of groups and needs in the community.

### Innovation and Leadership

This role includes encouraging and identifying new and alternative opportunities to provide for the recreation needs of the community.

## Facilitation and Communication

This role includes maximising networking between recreation and sport groups; exchanging information and advice; identifying and encouraging partnerships and consulting on issues of interest to the sport and recreation sector.

### 9. THE IMPLEMENTATION AND REVIEW OF THE RECREATION STRATEGY

The implementation of the Recreation Strategy will be monitored by an Implementation and Review Working Group. The working group will consist of representatives from Council Branches that have a key role to play in implementing the Strategy.

Council Branches will be required to integrate Actions from the Action Plan into Branch Plans and to report on the implementation timeline and process to the Working Group.

A review process is important to ensure that the Action Plan continues to respond to current issues and opportunities. The Recreation Strategy has been prepared as a working document therefore any review must consider changing social, environmental or economic factors that may affect timelines.

It is unlikely that there will be significant change to the principles that underpin the Strategy.

Year	Action
Annual monitoring	On an annual basis the Action Plan and priorities will be reviewed to identify changing needs and issues, and to ensure the Strategy is being implemented in accordance with key measures.
Every 3 years	Review of timelines, key directions and priorities.
Year 9	Commencement of the full review of the Recreation Strategy

### 10. SUMMARISED ACTION PLAN

The tasks outlined in the Action Plan respond to the issues and opportunities identified throughout the project and have been prioritised according to whether these issues and opportunities:

- were significant throughout the consultation process; and/or
- have particular implications in relation to the demographic trends in the municipality; and/or
- have been identified in other community planning projects; and/or
- have been identified as a priority by Council, state and federal government agencies.

Priority 1 Actions are those identified for implementation in years 1-3, Priority 2 Actions are those identified for implementation in years 4-6, and Priority 3 Actions are those identified for implementation in years 7-10.

Priorities may alter if resources become available earlier than anticipated, if community and Council priorities change and/or if resourcing is delayed.

A detailed Action Plan is included in 'The Background Papers' compiled as part of the project. The detailed Action Plan includes timelines, project partners and anticipated budget and resourcing requirements.

No.	Action		Priority		
		1	2	3	
1.	Action: Complete a Trails and Pathways Strategy for Mildura that:				
	<ul> <li>has a priority for linking places of significance within local communities;</li> </ul>				
	<ul> <li>identifies linkages between different urban areas and townships;</li> </ul>				
	<ul> <li>identifies linkages to regional sites of significance; and</li> </ul>				
	<ul> <li>identifies opportunities to effectively integrate footpath and trail networks.</li> </ul>				
2.	Social Sporting Activities				
	Action: Work with clubs and private providers to identify, facilitate and promote 'social' sporting				
	opportunities for all age groups e.g. 'Barefoot Bowls', 'Rugby in the Park', social junior basketball.				
3.	Health Lifestyle Groups				
	<b>Action</b> : Work with local communities to establish community-based 'healthy lifestyle' groups e.g.				
	walking groups, and to identify opportunities to improve environments for these groups e.g.				
	defining safe-off-road trails/tracks, circuit trails, improved integration between trails and footpaths,				
	information.				
4.	Safe Environments for Recreation				
	Action: Ensure the principles contained in 'Safe Environments for Physical Activity' and 'Safer				
	Design Guidelines for Victoria' are addressed when developing 'activity' environments, particularly				
	those in open space areas.				
5.	Community-based gymnasiums/fitness rooms				
	Action: Work with local communities and health agencies to research and identify opportunities to				
	establish fitness rooms/community-based gymnasiums in outlying areas.				
6.	Hope Project				
	Action: Engage with the 'Hope Project' (Chaffey Secondary College) project to identify				
	opportunities to maximise benefits to local sporting and recreation clubs and opportunities to				
	increase participation by project communities.				
7.	Arts and Cultural Strategy				
	Action: Ensure that Council's Arts and Cultural Strategy identifies and plans to support community				
_	based arts, including programs in small and remote communities.				
8.	Isolated/potential Isolated Groups				
	Action: Work with relevant community groups, agencies and private providers to profile				
	engagement (e.g. Active Retirement Group) opportunities for isolated/potentially isolated groups				
	(e.g. people in remote communities, people with language barriers)and to assist with the				
	establishment of new opportunities				
9.	Young People				
	Action: Work with a range of targeted recreation organisations (e.g. sport, community service,				
	arts) and youth based organisations (e.g. schools, youth clubs) to develop and trial strategies for				
	increasing participation by young people.				
				1 '	

No.	Action		riority	
4.0		1	2	3
10.	Girls in Sport			
	Action: Facilitate the establishment of a 'Girls in Recreation' Working Group:			
	- that focuses on and is facilitated by girls and young women;			
	<ul> <li>to develop strategies to address the barriers to participation;</li> <li>to identify and establish alternative pathways for girls into recreation activities and</li> </ul>			
	organisations;			
	<ul> <li>that trials different promotional and engagement strategies with targeted activities</li> </ul>			
	(traditional/non-traditional sports/recreation activities; and			
	- that involves and skills girls/young women to play the lead and active role in projects.			
11.	Older Age Groups			
	Action: Identify program and engagement opportunities that maintain health and wellbeing for			
	people in older age groups.			
12.	Indigenous Communities			
	Action: Advocate for an industry based approach to:			
	- research on engaging young indigenous people in sport (e.g. successful models,			
	social, family etc. 'environments' required to achieve and retain engagement; - developing and trialing a model of 'engagement' with a local indigenous community			
	and local sport and recreation organisations.			
13.	Web-based Volunteer Database			
	<b>Action:</b> Develop a web based Volunteer database that enables prospective volunteers and clubs			
	requiring support and advice to register.			
14.	Volunteer Strategy			
	Action: Ensure that Council's Volunteer Strategy:			
	<ul> <li>addresses the needs of all volunteer sectors;</li> </ul>			
	- identifies opportunities for existing volunteer support networks/organisations to better			
	integrate with each other; and			
	- identifies strategies and/or trial initiatives to encourage young people into			
15.	volunteering roles.  Young People and Volunteering			
15.	Action: Work with schools and/or school networks to:			
	- research school based volunteering initiatives (e.g. East Loddon Secondary College			
	in the Shire of Loddon) and associated outcomes (cost-benefit); and			
	- identify community volunteering initiatives that can be incorporated into the school			
	program.			
16.	Promotion of Recreation Opportunities			
	<b>Action:</b> Facilitate discussions with peak sporting and recreation activities to identify more effective			
	ways to promote participation opportunities using print media, internet, radio, TV etc.			
17.	Indoor School Sporting Facilities – Community Use			
	Action: Work with local schools to:			
	<ul> <li>identify barriers restricting community use of indoor school sporting facilities (e.g. insurance);</li> </ul>			
	- maximise community use of school facilities; and			
	- promote opportunities.			
18.	School Outdoor Sports Facilities – Community Use			
	Action: Research outdoor sport opportunities available through local schools including:			
	- an audit of facilities available;			
	<ul> <li>the preparedness of schools to increase community access and any conditions;</li> </ul>			
	- works required (if any); and			
40	- cost benefit analysis.			
19.	School Indoor Sports Facilities – Minimum Standards			
	<b>Action:</b> Liaise with the Department of Education to ensure that any new indoor sporting development on school sites adheres to minimum court dimensions.			
20.	Sustainability of Existing Clubs and Activities			
۷٠.	Action: Ensure the sustainability of existing sport and recreation clubs by facilitating discussions			
	and programs relating to:			
	- promotional strategies (proactive);			
	- club development programs (proactive); and/or			
	- co-location of clubs (when approached by clubs/associations).			

No.	Action	Priority		
110.	Aviivii	1 2		3
21.	Integrated and Co-operative Management Structures  Action: Facilitate discussions with clubs and organisations to identify opportunities for integrated and co-operative management and/or administration (e.g. membership databases, fee collection etc.) structures (particularly in rural areas).			
22.	Club Development Programs  Action: Identify opportunities to develop and implement generic (e.g. club administration, first aid, membership strategies, opportunities for people with disabilities/limited ability) club development programs.			
23.	Mallee Sports Assembly Action: Work closely with the Mallee Sports Assembly to identify the most effective way to support local clubs into the future.			
24.	Framework/Levels of Provision  Action: Develop a provision framework that clearly establishes different levels of provision for (across both urban and rural townships):  - play spaces (including playgrounds and skate parks);  - trails (may be done as part of the trails strategy);  - environmental areas;  - indoor sporting facilities; and  - outdoor facilities not included in the Open Space Strategy e.g. tennis courts			
25.	Criteria for Determining Recreation Development Priorities  Action: Develop a set of criteria that can be used by Council to prioritise different projects.  Submission Writing Support for Recreation Services			
26. 27.	Action: Allocate resources for support with the preparation of funding submissions.  Sunraysia Academy of Sport			
	Action: Consider providing support to the Sunraysia Academy of Sport.			
28.	Involvement of Peak Associations  Action: Facilitate discussions with key stakeholders to identify opportunities to increase the involvement of peak/state associations (e.g. advice and support to clubs, advocacy) in the region, and to strengthen the relationship of clubs with state associations.			
29.	<b>Tenancy Agreements Action:</b> As part of a review of tenancy agreements for all Council facilities, review the nature of agreements for all sport and recreation facilities.			
30.	Attracting Major Events  Action: Work with local sporting clubs and Associations to identify barriers and opportunities to better support (e.g. advocacy, planning, project management training, visitor packages etc.) initiatives to attract events to the region.			
31.	Council Grants/Funding Programs  Action: Review current recreation grants programs in relation to:  - The type and level of funding;  - Timing of funding programs;  - Small and larger communities  - Outcome requirements; and  - Consistency with the priorities in the Recreation Strategy.			
32.	<b>Equity and Amenity of Provision Action:</b> Review open space and township amenity provision and maintenance to ensure an equitable quality and level of provision for small communities.			
33.	Capital Works Contribution Policy (Sporting Infrastructure) Action: Prepare a policy that clearly establishes the level of funding that Council will consider for recreation infrastructure.			
34.	Funding of Infrastructure on Non-Council Owned Land Policy Action: Prepare a policy that clearly defines the type and level of Council funding of developments on non-Council owned land.			
35.	Open Space Strategy Action: Review of Council's Open Space Strategy.			
36.	Open Space Co-ordination Group Action: Consider the formation of an Open Space Co-ordination Group.			
37.	Shade Policy Action: Prepare a policy that articulates Council's position in relation to the provision of shade.			

38. Integrated Planning Action: A formal process established to:  Ensure the engagement of relevant Departments in all of Council's service planning process; and  Maximise outcomes from all strategic planning actions.  39. Town and Community Planning for Recreation Action: Develop relevant input and referral processes and ensure that recreation provision principles are addressed in all community planning and town planning projects.  40. Asset Database Action: Prepare and integrated information database for recreation assets.  41. Referral of New and Upgraded Recreation and Open Space Assets to the Asset Database Action: Develop and formalise a process to ensure that all new and upgraded assets are referred to the asset database.  42. Review of the Use of Sport and Recreation Facilities Action: Undertake a review (to include pavilions, halfs, sout/guide facilities on Council and non-Council owned/managed almo) of the usage of community facilities.  43. Provision of indoor Sport Facilities Action: Complete the Indoor Sport Facilities Action: Complete the Indoor Sport Facilities Action: Lisies with relevant industry and professional organisations and government agencies to address key community partnership issues relating to sport asset sets and services of the service of the services of the	No.	Action		Priority

consolidate or rationalise community buildings as part of any redevelopment strategy.						
	53.	Operational Support to Non-Council Owned/ Managed Facilities Policy				
Action: Develop a policy that clearly defines the type and level of support that will be provided to						

No.	Action		Priority		
		1	2	3	
	groups that manage or operate from non-Council owned land. The policy should consider support relating to advice (all Departments), operational support (e.g. tree management, maintenance),				
	advocacy support etc.				
54.	Amenity and Quality Standards Policy				
	Action: Ensure that all development proposals identify how they are going to address				
	environmental amenity, quality standards and sustainable water use.				
55.	Compliance of Council buildings with Relevant Codes of Practice.				
	Action: Develop a process for ensuring compliance of all Council (and community				
<b>50</b>	owned/managed facilities comply with relevant legislation and/or guidelines.				
56.	Review of Mildura Recreation Reserve Master Plan				
E 7	Action: Review the Mildura Recreation Reserve Master Plan				
57.	Preparation of Minor Reserves Master Plans Action: Complete Master Plans for Councils local and minor reserves in consideration of the				
	policies that will determine the type and level of development and amenity for each reserve.				
	policies that will determine the type and level of development and amenity for each reserve.				
58.	Management Plan for Lake Cullulleraine				
00.	Action: Prepare a integrated management and development plan for Lake Cullulleraine				
	Recreation Precinct (Water body and surrounds)				
59.	Management Plans for Wetlands and Associated Natural Areas (including Cardross Lakes				
	and Lake Hawthorn)			'	
	Action: Prepare Management Plans for Identified Wetland and Associated Natural Areas.				
60.	Management Plans for Riverfront Reserves (including Apex Park as a priority)				
	Action: Prepare Management Plans for Riverfront Reserves.				
61.	Managing Recreation Impacts in Natural Environments				
	Action: Work with relevant agencies and community groups to ensure:				
	<ul> <li>a responsible approach to activities that are conducted in natural environments;</li> </ul>				
	- to maximise opportunities for built structures in these areas to integrate with the				
	environment; and				
CO.	- to develop and put in place responsible user protocols.				
62.	Innovative Water Management Practices				
	<b>Action:</b> As part of Council's Sustainable Water Use Plan continue to identify opportunities for innovative water access, storage and usage strategies to maximise access to water for recreation				
	and open space uses.				
63.	Open Space Watering Practices			-	
03.	Action: Review all watering protocols and systems on Council owned and managed land to				
	ensure that they comply with sustainable water use practices (e.g. time of day, location of				
	sprinklers, community education).				
64.	Management of Sporting Fields (Water)				
	<b>Action:</b> Develop a longterm plan for the management and provision of sporting fields that are				
	currently dependent on access to a viable water supply.
